Scality RING & Veritas NetBackup™

Let's face it; content is growing exponentially today thanks in part to the video and data requirements expected in order to serve the needs of Digital Business, Virtualization, Cloud, Big Data and IoT. Ensuring that data is always available no matter what disaster occurs requires a complete backup solution that understands your requirements for scale, integrity and speed.

Scality and Veritas Technologies have partnered to build a joint Enterprise Backup Solution that exceeds your organization's Backup and Recovery expectations by combining Veritas NetBackup's world-class, unified data protection platform with Scality's award-winning RING software defined storage solution that facilitates unlimited linear scale, 14x9's of durability and a lower TCO without being locked into proprietary hardware platforms.

Unified Data Protection for Physical and Virtual Environments

Scality RING is Veritas NetBackup certified and specific configurations have been configured to meet the largest and most demanding datacenter environments delivering breakthrough capabilities for virtualized systems that go well beyond what traditional backup practices can achieve. In addition, Scality RING is certified with NetBackup CloudCatalyst for efficient and cost-effective deduplication at the source.

With Veritas NetBackup you get a single, intuitive management console that reveals all backup and recovery activity, and allows consistent policies and service levels to be enforced across the enterprise.

Using Scality RING to manage the physical storage for Veritas NetBackup delivers a level of scale, performance and durability at a TCO that tape and NAS-based targets could only dream of.

Key Benefits

Faster Recovery

Unlike conventional Network Attached Storage (NAS), Scality + Veritas enables high density hard drive recovery in minutes, not days, reducing backup windows for large data sets and restore times. Complete parallelism and full scale-out file system support enables the storage throughput required to scale linearly across mixed workloads without degrading performance.
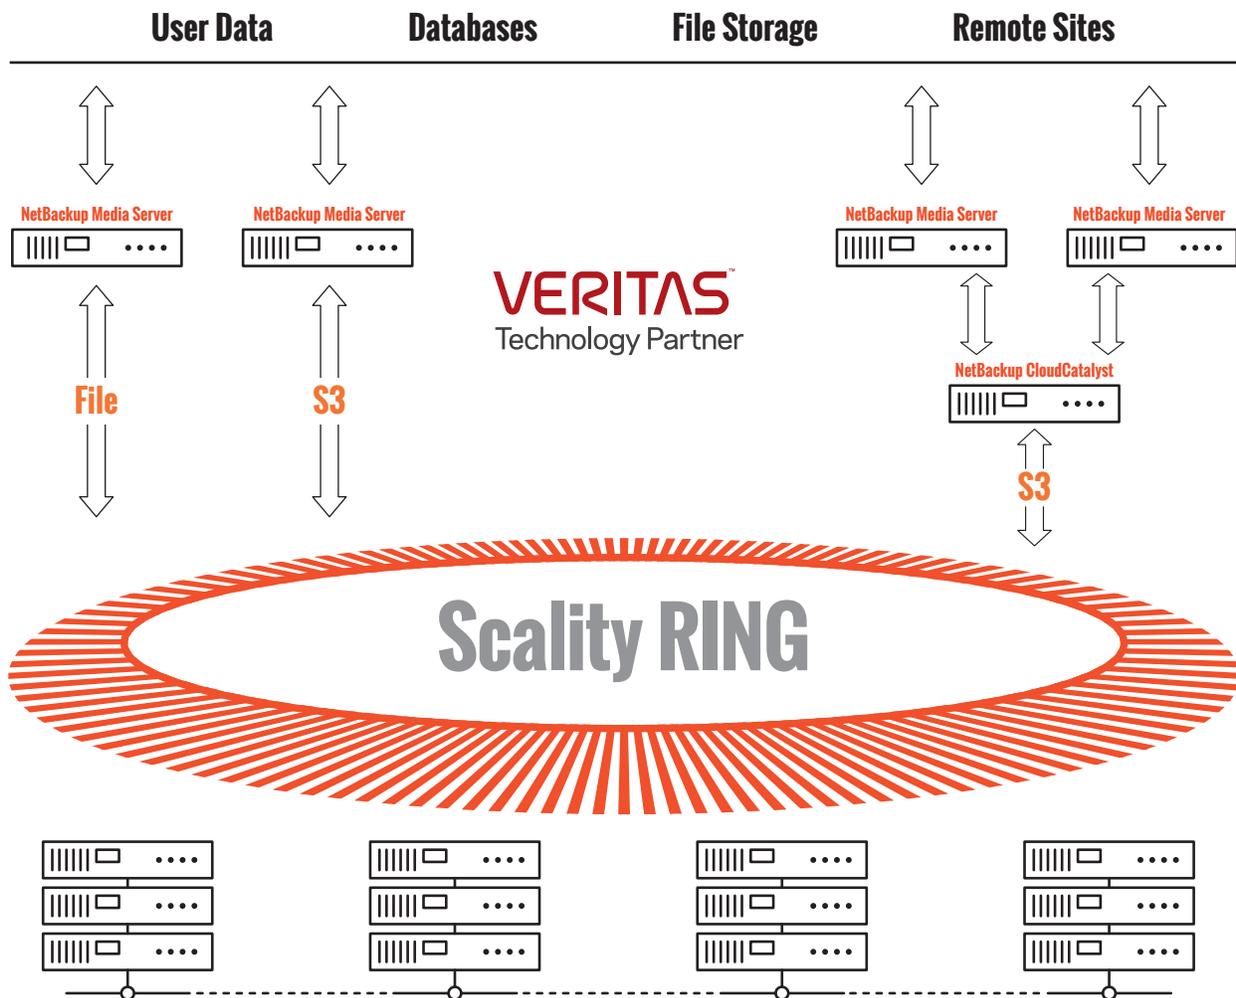

Lower Costs

Lower Costs Scality + Veritas offer worryfree expansion while reducing TCO by up to 90%. You can now leverage standard servers seamlessly (and those supply agreements!) to reduce training and maintenance costs – and for rapid scaling. Automatic rebalancing and self-healing enables efficient and cost-effective capacity expansion and server replacement for better overall lifecycle management.

Perfect Fit

A safe, fast, affordable backup solution can place huge demands on digital businesses. With the combination of Veritas and Scality, you get the same backup and recovery used in the world's largest and most complex heterogeneous environments. Mutual certification ensures you aren't chasing vendors when problems arise. Whatever the fit, we've got you covered.

Safer Data

Enterprises demand data durability in the 14x9's with an intuitive management environment. This combined solution enables you to meet those demands while increasing data recovery times signficantly from traditional systems. Extreme fault tolerance with geo-distributed deployment and configurable protection policies (replication or erasure coding) take your protection to another level.

Linear Performance Scaling • Limitless Infrastructure Scaling

About Veritas Technologies LLC enables organizations to harness the power of their information, with information management solutions serving the world's largest and most complex environments. Veritas works with organizations of all sizes, including 86 percent of global Fortune 500 companies, improving data availability and revealing insights to drive competitive advantage. For more information, visit www.veritas.com.

About Scality Scality builds the most powerful storage tools to make data easy to protect, search and manage anytime, on any cloud. We give customers the autonomy and agility necessary to be competitive in a data-driven economy. Recognized as a leader in distributed file and object storage by Gartner and IDC, we help you to be ready for the challenges of the fourth industrial revolution.

Let us show you how.
